Protecting your Debit Card Information

Debit card fraud is on the rise. Do you know how to protect yourself? Below are some tricks that can help keep your card information safe.

- Cover your PIN: When entering your PIN, cover the terminal to prevent cameras and those around you from viewing this information.
- Use Interac Flash on your debit card: When you use the InteracFlash feature, the card never leaves your hand, preventing the collection of information used to replicate your magnetic strip or PIN.
- Watch how far your debit card goes into a POS/ATM machine: The new debit cards have a built in security feature. When inserting your card into terminal, you should be able to see two shades of blue on your card. If you can only see the lightest blue, the card has gone in too far, enabling tampered terminals to capture the magnetic strip information. As shown above.
- Let us know if you are travelling: To ensure that your card will work when out of Canada let us know when and where you will be going ahead of time.
- Monitor your account: Be sure to check your statements within 30 days of receiving them, and let us know if anything looks unfamiliar.

Hyperwallet Service Ending

Effective February 1, 2016 Hyperwallet services will be ending. If you have a Hyperwallet account please be sure to cash out your account before this date. As of October 15, members will not be able to sign up for Hyperwallet services.

Plan on travelling in the near future?

Don't forget to notify Landis Credit Union of your travel plans to ensure you have access to cash while abroad.
