Fraud Prevention

Fraudsters are always coming up with new ways to gather your personal information and profit from it. Below are a couple examples of current scams and how to protect yourself from them:

- **Spearphishing:** Individualized attacks using personal information found on social media posts to impersonate an online service.
 - **Prevention:** Watch what you post online, watch what you sign up for, never use a link in an email to direct you to the service, find the site online using a search engine.
- **Ransomware:** Hackers encrypt your computer and hold your information ransom, demanding payment to decrypt it.
 - **Prevention:** Back up Critical information often, do not click on unknown links or download untrusted software.
