## Fraud Prevention Tips

Fraud is becoming increasingly more common and varied in its approach. Phone calls, letters, texts, emails, job scams, overpayment scams, CRA scams, and Facebook messages and links are some of the methods.

Some tips to protect yourself:

If you receive a message from someone you did not expect or it does not sound like the person typically does, do not give them any information. Instead call or message them back with a number, website, or email that you have verified independently.

Be cautious of phone calls from local numbers as scammers can alter the number that they are calling from to make it appear local.

Never open any attachments or click on any links in digital messages, unless you were expecting it.

If you are accepting a payment. Accept the exact amount only. Do not accept a cheque for a higher amount and send the extra money back. This is an overpayment scam using a fraudulent cheque.
